

Activity 4.3

“Exploring” with The Hexagon Tool

The Hexagon Tool is designed to help states, regions, and sites systematically evaluate new and existing innovations via six broad factors: needs, fit, resource availability, evidence, readiness for replication and capacity to implement. View The Hexagon Tool lesson, then move through a set of guiding questions on your own or with your team.

Instructions

- On your own or with your team, view [“Lesson 1: Hexagon Tool”](#). (running time 2 min. 57 sec.)

Apply it Now

After reviewing Lesson 1, take a few minutes to reflect on the following:

- Is there a current initiative you could use to practice using The Hexagon Tool?

- Are there any new, or potential initiatives or programs on the horizon in your organization? If so, when might you introduce this tool to support your decision-making process?

- Who would you want to include in your ‘Hexagon’ discussion(s)?
